

Method for reacting (i) thermoplastic polyurethanes with (ii) compounds having isocyanate groups

Abstract

5

The invention relates to a process for reacting (i) thermoplastic polyurethanes with (ii) compounds having isocyanate groups, where the (ii) compounds used having isocyanate groups comprise (iia) compounds having at least three isocyanate groups based on aliphatic isocyanates and (iib) compounds having two isocyanate groups

10

based on aromatic isocyanates.
